Dear Ms Dabski

Please find attached a Company announcement for release to the market.

Yours Sincerely,

Jeff Bennett  
**Chairman**

## **ENTELLECT SOLUTIONS AND BRISBANE CATHOLIC EDUCATION SIGN SIGNIFICANT NEW CONTRACT**

- **Leading edge Student Reporting and Assessment system**
- **Incorporating ARC Research and Development IP**
- **License and services fees of approximately \$3 million**
- **Aligned with new Federal Government performance reporting policy**

Following an extensive analysis and design project, Entellect Solutions (ESN) and Brisbane Catholic Education (BCE) have entered into an agreement to develop and deploy a leading edge Student Reporting and Assessment solution, based on the Intellectual Property and patents acquired by ESN from ARC Research & Development (ARC) in February 2008. The contract is expected to generate license fees and service revenue in excess of \$3 million in the first two years.

This agreement will deliver a state of the art software solution for improving the quality of teaching and learning across all levels of education by providing students, parents, educators and government with unprecedented access to information about student attainment and performance.

Enterprise-scale software applications are the natural choice for modern education systems worldwide as they allow all information for a state or district to be stored centrally. Analysis of learning trends can occur across multiple learning institutions and provide educators with an opportunity to build on best practice and target areas of weakness.

The software is a business intelligence system that can be a stand-alone application or seamlessly integrated into ESN's eMinerva student management system to provide a single data repository for all of an institution's student data. It will also be compatible with other third party student management systems.

Mr Joseph Younane, CEO of Entellect Solutions said "This agreement with BCE underscores the continued confidence in Entellect to provide solutions for educational systems. The quality of our acquired ARC IP and its relevance in satisfying the exacting demands of Student Assessment and Reporting requirements, together with our proven ability to deliver on these, is a mark of the significant progress that ESN has achieved during the past year. This project is particularly timely given the Government's recent initiatives to create a National Curriculum Reporting and Assessment framework."

Mr Warren Armitage, CIO of BCE said "We are excited about working with Entellect to extend beyond eMinerva to a solution that offers our students, parents and schools innovative learning opportunities."

Mr Jeff Bennett, chairman of Entellect Solutions said "There is strongly emerging demand both in Australia and internationally for accountability in the education environment. This new product will satisfy that requirement and will deliver a world's best practice system that significantly enhances ESN's product suite. We recognise BCE's support in this project and their continued trust in ESN and eMinerva."
